

To The Icelandic Association of Biomedical Scientists

20th May 2015

## **Declaration of solidarity**

At The Danish Association of Biomedical Laboratory Scientists we want to show our support and solidarity with the members of The Icelandic Association of Biomedical Scientists who has gone on strike for more than a month.

We support their fight for better wages and working conditions. After a fatal economic crises and collapse of the banking system in 2008 Island is finally getting back on track. And the working people of Island should also be part of the current upswing in Island.

Therefore we support The Icelandic Association of Biomedical Scientists when they fight for higher salaries, just as doctors and teachers have been granted earlier this year.

Finally we want to show our respects for the Biomedical Laboratory Scientists who has been on strike since April. We know it can be tough to be on strike but we hope the employers will meet your demands.

And you're not alone. We understand there has been called for a general strike in Island from next week which has as raise of the minimum wage as the main demand.

The Danish Association of Biomedical Laboratory Scientists support the fight for better wages and working conditions in Island.

Best wishes

The Danish Association of Biomedical Laboratory Scientists

Bert Asbild, chairman

Martina Jürs, vice chairman

Solveig Dein Kjeldgaard, vice chairman
