Swedish Association of Health Professionals support our Icelandic colleagues

The Swedish Association of Health Professionals support our Icelandic colleagues in your struggle for higher salaries and better work conditions. The health care employers have to realise that Iceland need their biomedical scientists, midwives, nurses and radiographers in order to be able to be a strong and prosperous country.

The knowledge and skills of our professions mean the difference between life and death. A good work environment and fair salaries are essential if Iceland is to maintain a health care service of high quality and safety. We sincerely hope that the on-going conflict will come to an end very soon.

Best wishes from 113 000 Swedish Biomedical Scientists, Midwives, Nurses and Radiographers.

Sineva Ribeiro

President
